

Different perspectives,
one shared purpose

A Research on Health and Social Care Professionals Perspectives on TKA Care

Shaping the Future of Total Knee Replacement Care

Aim of the Study

To explore healthcare professionals' perspectives on the structure, processes, and outcomes of total knee replacement care across different health service systems

Are you eligible to participate?

You are eligible if you are a health and social care professional involved in the care of patients undergoing knee replacement, such as (but not limited to):

- Orthopaedic surgeons
- Physiotherapists or rehabilitation professionals
- Nurses involved in perioperative or orthopaedic care
- Researcher involved in Joint Replacement
- Other allied healthcare professionals involved in the management of the knee replacement patient

What would my participation involve?

- Complete the online survey, sharing your perspectives and experiences related to the delivery of total knee replacement care across healthcare systems.
- At the end of the survey, you will have the option to volunteer for a follow-up online interview to share your perspectives in more detail.
- Participation in the interview is completely optional.

How can I participate?

- Access the survey using the QR code below or by clicking the survey link.
